Profitable today.
Built to dominate tomorrow.

Consolidating a fragmented, cash-generating Nordic industry — with a clear path to owning the energy infrastructure itself.

3

SEK 30M
EQUITY RAISE · CLOSES 31 JUL 2026

24/7
BASELOAD — NO WEATHER RISK

Amara Energy

The Nordics need baseload.
Geothermal is the only gap left to fill.

Nordic energy demand will double by 2050. Only one source can fill the gap.

Offshore wind
UNPROVEN

Not viable at scale — yet.

Nuclear
CONTESTED

Decade-long timelines.

Hydro power
MAXED OUT

No room left to grow.

Geothermal
THE GAP

Proven. Scalable. Untapped.

May 2026 — Fervo Energy files a $1.33B IPO at a $6.5B valuation. The largest clean-energy float of the year.

June 2026 — World Geothermal Congress names AI mapping the new industry standard. The sector is moving fast.

PHASE ONE — TODAY

A low-risk consolidation strategy — not a speculative technology bet.

Hundreds of profitable, family-owned geo-energy firms. Fragmented, undercapitalised — ready to consolidate. Amara is doing it.

Immediate profitability

Profitable from day one — existing customers, crews, project flow.

Owners locked in for 3 years

Founders stay on. Know-how and relationships stay intact.

Execution risk, not invention risk

We buy proven operators — we don't bet on unproven tech.

A BUSINESS THAT GROWS ON PROFITS, NOT PROMISES

3

acquisitions already completed, each contributing strong profitability

SEK 400M

of assets already on the Group balance sheet

10–15

additional acquisitions targeted in 2026 alone

#1

target position in Nordic shallow geo-energy within 1 year

CREATING VALUE THROUGH SCALE

One integrated leader — not a portfolio of small firms.

Scale buys what no single family firm ever could: buying-power, efficiency, brand.

Purchasing power

Bigger volumes. Better supplier terms. Fatter margins.

Centralised administration

One back office. No duplicated overhead.

Pan-Nordic brand & reach

One brand, one voice — and the scale to win bigger projects.

The fragmented market becomes one integrated industry leader.

Five subsidiaries. One complete, revenue-generating stack.

No other Nordic operator owns this combination — shallow drilling to digital modelling, all in-house.

SveBorr

DRILLING · EST. 2003 · KARLSKOGA, SE

The Group's core operating engine. Water and geothermal drilling across Sweden.

DI Tech

DRILLING · EST. 2014 · VÅRGÅRDA, SE

Compact rigs for tight, hard-to-reach sites. Low environmental footprint.

Kraft

DRILLING · EST. 2009 · ØSTFOLD, NO

Amara's foothold in Norway. Built for tough ground conditions.

GeoPulse

GEO-ENGINEERING · DEEP-WELL DESIGN

Deep-well design, powered by 30+ years in North Sea oil & gas.

Iion

DIGITAL TWINS · REAL-TIME DATA

Proprietary real-time analytics. One more edge — not the whole story.

SEK 400M in assets already on the balance sheet — before the 2026 acquisition pipeline is added.

Three deals done.
Over 100 more identified.

100+ candidates already lined up in Sweden and Norway. Finland and Denmark next. No one else is doing this at scale.

- **Settlement:** Shares (3-yr lock-up) + cash
- **Retention:** Management retained via incentive model
- **Next markets:** Finland & Denmark expansion

A PIPELINE NO ONE ELSE IS BUILDING

100+

acquisition candidates identified in Sweden & Norway alone

3

acquisitions completed, each already profitable

10–15

targeted acquisitions in 2026

4

Nordic countries in the long-term expansion map

Hotter with every metre — a resource that only grows with depth.

Go deeper, get hotter. A shallow heating business becomes a combined heat & power platform.

200–1,000m · ~10–25°C

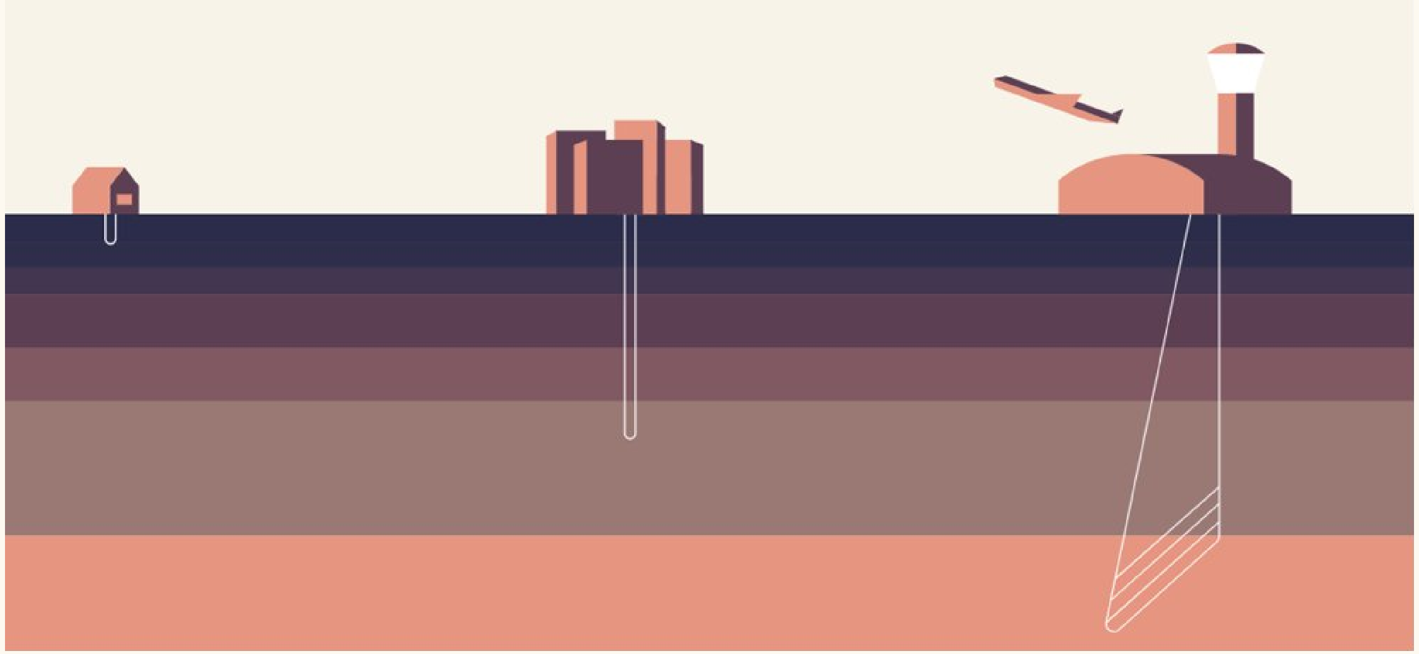
Today's proven, profitable shallow business.

1,000–2,500m · ~25–50°C

Direct heat for large consumers — near-zero competition.

2,500–5,000m · ~50–125°C

Combined heat & power from Amara-owned assets.



Illustrative depth and temperature profile, not to scale. Amara Energy AB, July 2026.

Amara Energy

From contractor today to infrastructure owner tomorrow.

Consolidation builds the balance sheet. The balance sheet funds going deeper. Deeper means Combined Heat & Power.

Shallow · today

200–1,000m

Profitable, cash-generating, de-risked — already running.

Deep heat · next

1,000–2,500m

Airports, hospitals. Near-zero competition.

Own & operate · future

2,500–5,000m

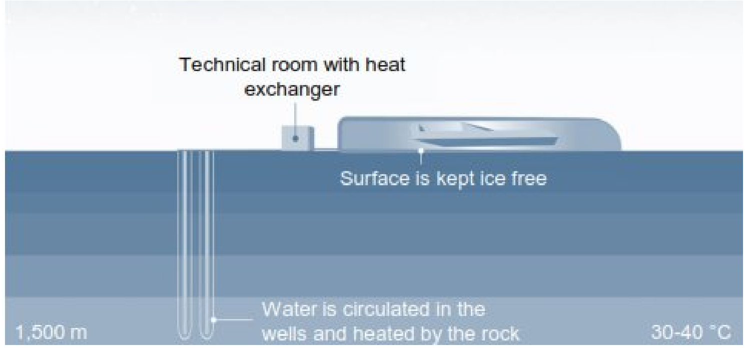
Combined heat & power. Recurring revenue. We own the asset.

Next: a dedicated utility arm — built for infrastructure investors who want long, stable, inflation-linked cash flows. *Backed by Scandinavia's open geological data and Amara's own well archive.*

AVINOR Amara Energy

Deep wells aren't an ambition. They're heating Oslo Airport today.

In 2018, Amara Energy drilled two 1,500 m wells at Oslo Airport Gardermoen to heat the engine test area directly from the rock. The wells have run continuously ever since — the same "Deep heat" tier the strategy is built to scale.



KEY DATA — AVINOR PROJECT

Client **Avinor**	Time frame **2017–2018**
Wells **2**	Well depth **~1,500 m**
Heat delivery **~300 MWh / yr**	Circulation **~3,000 hrs / yr**
Circ. temp **10–15 °C**	Well diameter **165 mm**

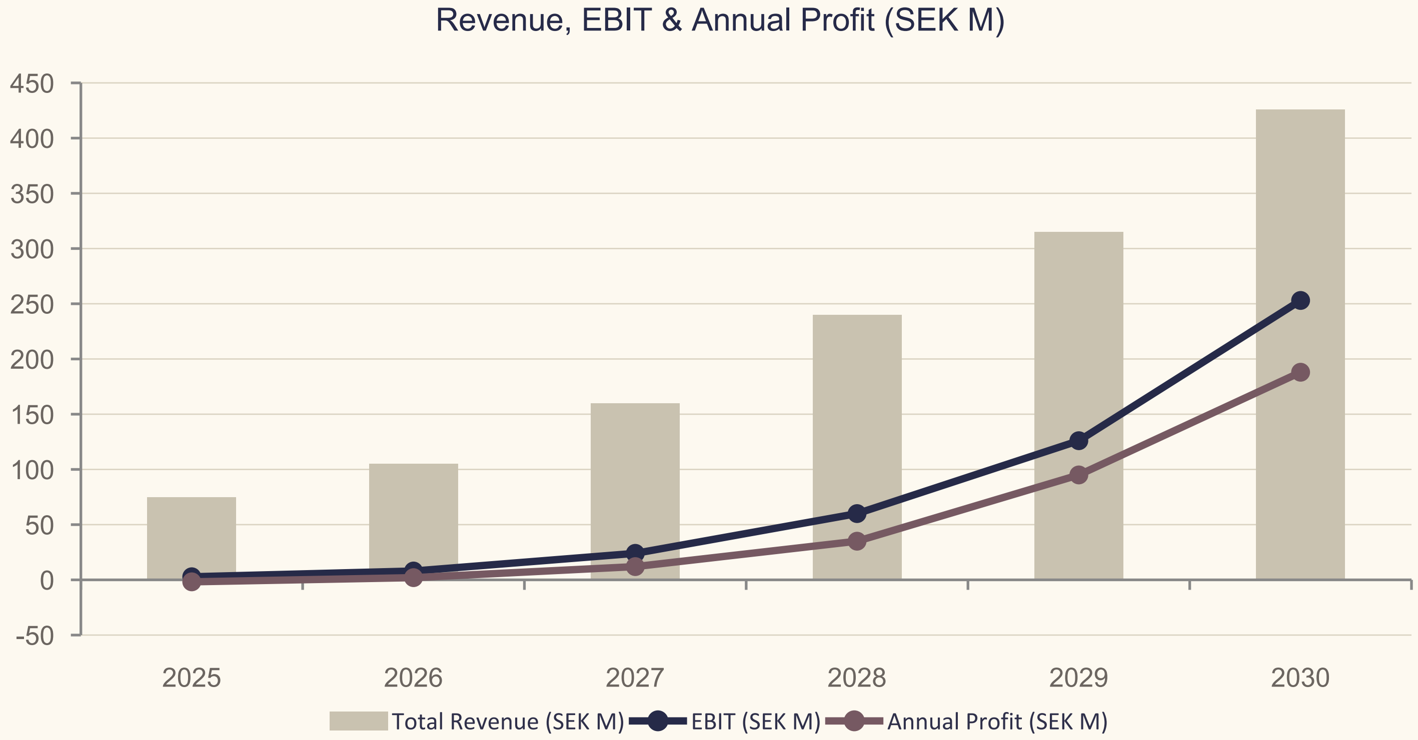
“By installing Amara Energy Wells at the Engine Test Area we spend less in a whole year than we used to spend in January alone with our previous electricity solution.”

— Dag Falk-Petersen, CEO, Avinor

Source: Avinor / Amara Energy project record. First production 30 October 2018; wells in continual operation since. Not financial advice.

SEK 75M → SEK 426M. Current portfolio — no acquisitions assumed.

Projections reflect the existing portfolio companies only — and margins expand sharply: EBIT margin rises from ~4% (2025) to ~59% (2030). **The mix shifts toward higher-margin deep wells and recurring software revenue from GeoPulse and lion.** Recurring energy revenue from the build-own-operate model is excluded from the projections.



41%

Revenue CAGR 2025–2030

SEK 253M

EBIT in 2030 (from SEK 2.8M in 2025)

SEK 188M

Annual profit in 2030 (from -SEK 1.8M in 2025)

2.4x

Pre-money valuation ÷ 2030 EBIT

Entire Group consolidated, all figures SEK. Based on current portfolio only; no further M&A assumed. Forward-looking; not financial advice.

Amara Energy

The entry holds up — even on a skeptic's assumptions.

A discounted cash-flow on the current portfolio implies an enterprise value above the **SEK 600M pre-money valuation** across the full range of discount rates and exit multiples — new shares are issued below intrinsic value in every case.

EV/EBITDA exit multiple →

Discount rate ↓	6×	8×	10×	12×
10%	1273 2.1×	1564 2.6×	1854 3.1×	2145 3.6×
15%	993 1.7×	1216 2.0×	1438 2.4×	1661 2.8×
20%	785 1.3×	957 1.6×	1129 1.9×	1301 2.2×
25%	627 1.0×	762 1.3×	896 1.5×	1031 1.7×

Implied enterprise value, SEK M · × = multiple of the SEK 600M pre-money valuation

≥ 2× entry · 1.5–2× · 1–1.5× · ≤ entry

WHAT IT MEANS FOR YOUR RETURN

~4.0× base-case exit multiple

~SEK 2.53B base-case 2030 exit value (10× on SEK 253M of 2030 earnings) vs. the SEK 630M post-money valuation — before any further M&A upside.

~36% implied IRR

on the base case — a mid-2026 entry at the SEK 630M post-money valuation to a 2030 exit.

Margin of safety

even at a 25% discount rate and a 6× exit, implied EV (SEK 627M) still covers the SEK 600M pre-money valuation.

Illustrative DCF on the current portfolio only; no M&A assumed. TV = 2030 earnings × exit multiple, single discount. IRR/multiple illustrative, enterprise-value basis vs. post-money, before net debt and further dilution. Not a forecast or financial advice.

Straight equity at a fixed valuation.

SEK 30M equity raise at a SEK 600M pre-money valuation. Rolling close, first-come first-served. Closes 31 July 2026.

SEK 600M
Pre-money valuation
New ordinary shares issued at a fixed SEK 600M pre-money valuation.

SEK 630M
Post-money valuation
Implied Group valuation with the SEK 30M round fully subscribed.

Direct ownership. Upside geared to the listing.

Illustrative allocation and mechanics only; not a forecast of returns. Not financial advice.

THE COMPARABLES

The model has been done before — in Sweden.

Buy private firms at ~4–6x earnings. Re-rate them inside a listed group at 15x+ earnings. That gap is the return — but importantly the gap is based on substantially higher profitability margins — creating a double multiple effect.

4x
Teqnion
LISTED NASDAQ STOCKHOLM · 2019

SEK 40 → SEK 160/share. Early sellers now hold 4x their money.

2x+
Green Landscaping Group
LISTED NASDAQ STOCKHOLM · 2018

SEK 20 → SEK 45/share. A fragmented industry, rolled into one giant.

$6.5B
Fervo Energy
IPO FILED · MAY 2026 · USA

Google-backed geothermal. The biggest clean-energy IPO of the year.

WHAT RARELY COMES TOGETHER IN ONE INVESTMENT

- Immediate profitability from day one
- Exposure to the fastest-growing segment in energy
- Low execution risk — proven operators, not unproven tech
- A real path to infrastructure ownership and recurring revenue

Share prices as of April 2026. Past performance is not indicative of future results. Not financial advice.

Operators. Investors. Builders.

Geo-energy, fintech, corporate finance, engineering — capital markets veterans who've built and sold before.

WHY INVEST NOW

A proven business today.
An infrastructure champion tomorrow.

The near term is de-risked

Cash-generating buys of proven companies. No tech bets.

The playbook is proven

Teqnion: 4x. Green Landscaping: 2x+. Stronger tailwind here.

The upside is structural

Contractor today. Infrastructure owner tomorrow.

The timing is exceptional

Fervo's $1.33B IPO. The world is pricing geothermal — now.

The terms are simple

Straight equity at a SEK 600M pre-money valuation.

The window closes 31 July 2026.

Minimum investment SEK 250,000 · amara.energy
