

**Tobor Robot
Corporation**

DBA Toborlife AI

Our robots for Home & Business

With our exclusive Robot Control Software, Robot Harness™ performs autonomous tasks that it learns from you respond to commands through voice, remote, and phone application all included

Homedog

Security

Roaming patrol can be train what to look for, how to react

Education & Entertainment

Delight everyone by having it perform tricks & educate others about robots

Carry your things & follow you

Carry up to 22 pounds

Homedog Pro

Security Patrol

Roaming camera that can go anywhere & provides a live feed.

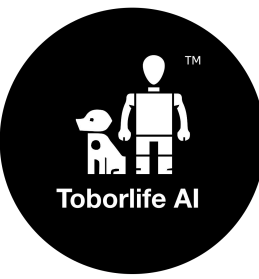

Inspection and Reporting

Counts, photographs, alert to visitors.

Business Growth

Attract new customers, distribute coupons, meet and greet, draw a crowd.

Product Margins

Robot + Autonomous Software = Robot Solutions

Hardware Margin w/ Software gets Margin to 50% (33-40% w/o)

Home Dog

\$6,000 Sell Price

\$3,000 COGS

\$3,000 Gross Profit

Home Dog Pro

\$10,000 Sell Price

\$5,000 COGS

\$5,000 Gross Profit

B2 or G1 Robots

\$70,000 Sell Price

\$35,000 COGS

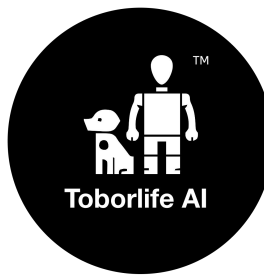

\$35,000 Gross Profit

Additional monthly service revenue not included in above

*software licenses and fees

Toborlife Software: Robot HarnessTM

Autonomous controls software development for home & business

1. **Patrol Guard:** Covers a set territory, and reports any suspicious activity
2. **Home Security & Companion:** Provides company & entertainment, patrols property, and reports any suspicious activity

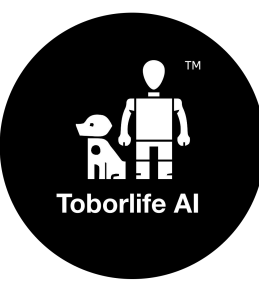

Software development & functionality

Navigation: Autonomous point-to-point navigation & map its environment while judging safe or unsafe areas

Recognize & Report: Trained to recognize conditions, snap photos & count objects

Trigger Base Command: Perform base commands after witnessing a trained event & mapped to the action by the user

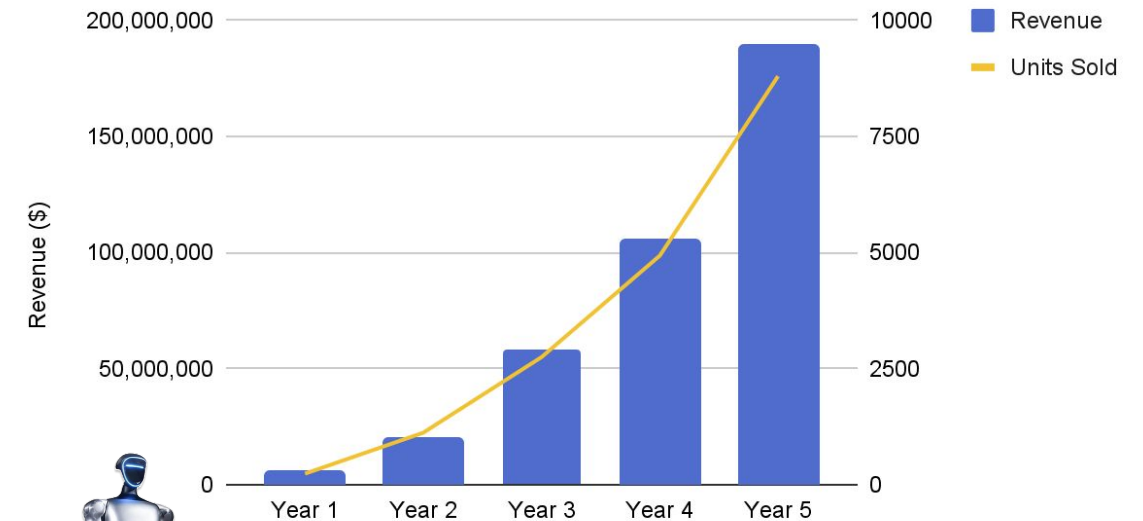

All Robots

Our **Robot Harness** TM Control System is deployable on other robots including B2, G1, & H1-2, and **non-Unitree models**

- **Go2 EDU**: lowest cost - \$30k per 2
- **B2**: heavy duty, waterproof, longer operating time, heavier loads
- **G1**: humanoid form allows greater access, camera view improved
- **H1-2**: heavier payload & faster

Robot Revenue vs. Year

H1-2

G1

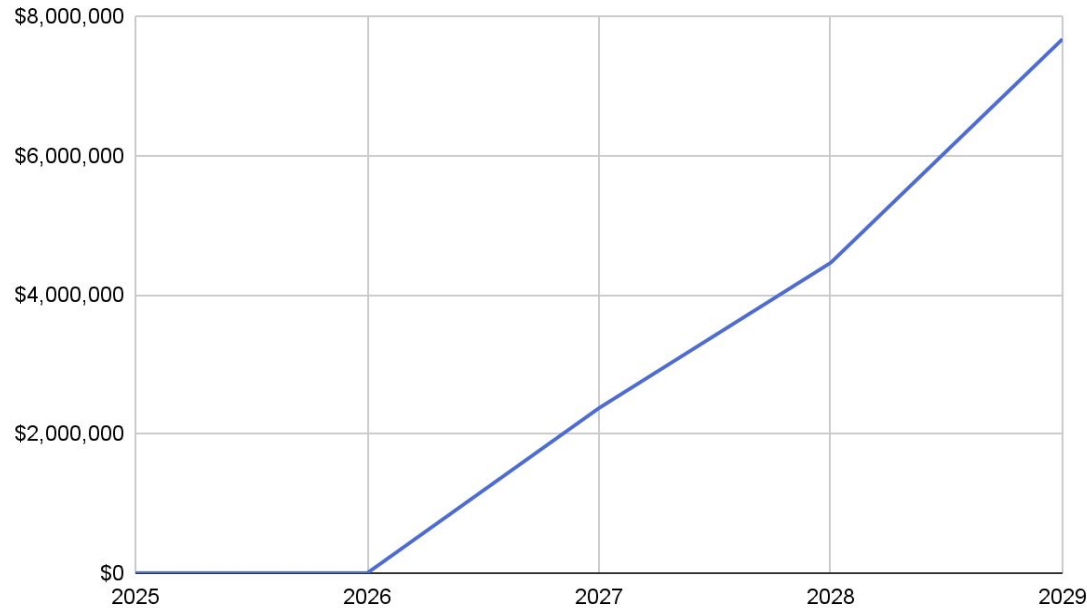

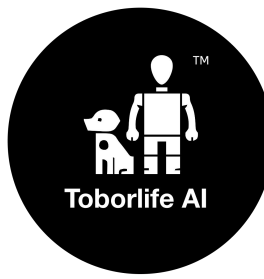

B2

Go2 EDU

Robot HarnessTM Subscription Fees

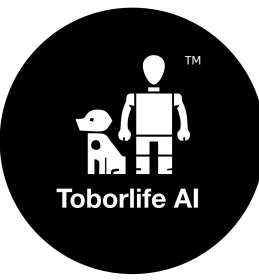

A monthly charge equal to roughly 2% of the robot solution's selling price, will be charged as an optional subscription fee for:

- 1) Cloud based AI and storage
- 2) Software maintenance/support
- 3) Regularly added new feature updates to the control systems

1% Cost of Servicing + 1% Towards Profit = 2% Monthly Service Fee

Example: \$200 Monthly Fee = \$100 Cost of Fulfillment & \$100 is Profit

Key Competitive Advantages

1. B2B / B2C / Solution-Oriented **Marketing**

Established marketing processes and team with proven track record

2. Applying Cutting Edge **Autonomous Robot Controls**

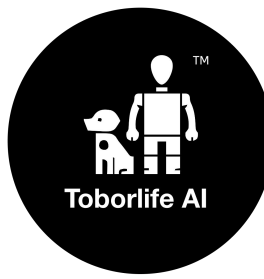

***Robot Harness™** Proprietary software enabling applications*

3. Partnership with Manufacturer for **Supply of Advanced Robots**

Referrals, Pricing, Availability, Support

“Unitree looks forward to rapidly growing sales in the USA and we are pleased to have Toborlife working with us, marketing and supporting our products. We are optimistic about our prospects together” - Tony Yang, Vice President of Business Development, Unitree

Roadmap Markets & Technology

Markets we will target...

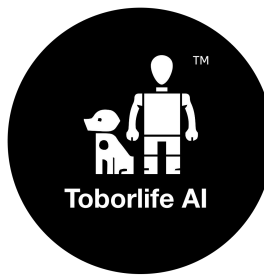

1. Fire and Rescue (Q3 2025)
2. Security Patrol- Autonomous movement with Toborlife AI & Analytics (Q1 2026)
3. Hospitality - Partnering with players in the industry to integrate for various hospitality needs
4. Entertainment - Small but high profile market
5. Industrial Maintenance - Autonomous movement with integrated sensors
6. Home & Health Care
7. Corrections Officer Robotic Assistance System - Various CO Duties
8. Education - Curriculum

Robot Harness[™] Our Proprietary Control System

We will license for use this functionality and use our development team to build out custom UI, feature sets, tailored for our markets.

1. Autonomous Motion
2. Facial Recognition
3. Sensor Integration & Analysis
4. Server & Cloud Storage
5. Two-Way Communication
6. Base Commands Series triggered from Observed

Tobor Security Software Q1 26

\$47.8 billion spent in 2023 on security services in the U.S.

Statista Research Department : <https://www.statista.com/statistics/294206/revenue-of-security-services-in-the-us/>

800,000+ Security Patrols employed in the USA

20% have patrol & report duties, and can easily be replaced by robots

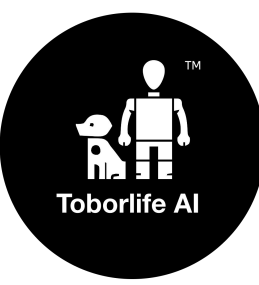

160,000 addressable market = 1% of this market , 1,600 guards:

1,600 x \$30,000 **revenue per pair of robots** = \$48,000,000

1,600 x \$6,000 **service fee for pair** = \$9,600,000

For every 1% of the 20% addressable guard market, there is expected annual revenues of

\$57 Million!!

Robot Harness: Patrol Guard

Our proprietary software enabling autonomous robot controls provide:

Navigation

Point-to-point navigation, judge safe & not safe areas

Recognize & Report

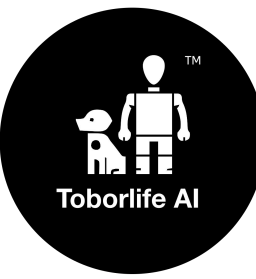

Train to recognize certain conditions (ex. Open doors, windows, & people, defined conditions) and notify

Return to Base

Automatically returns to base when battery is low to recharge

Executive Team

David Schulhof, CEO

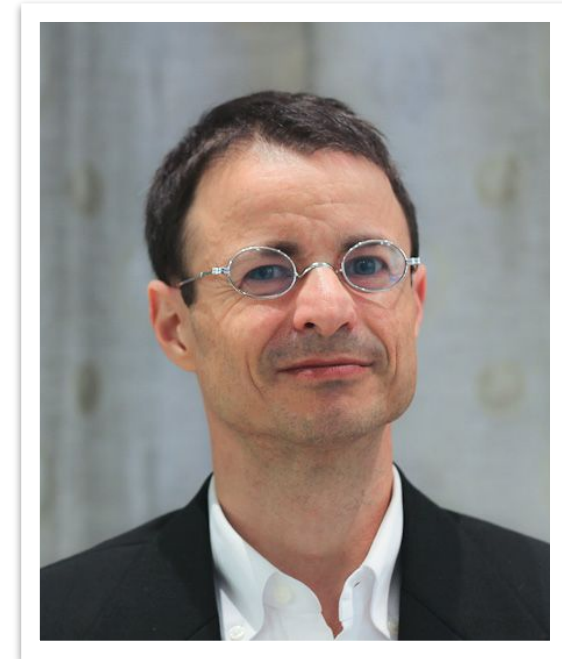

Marketing Genius, Serial Entrepreneur, with Drive and Passion,
Built over 12 multi million dollar sales and marketing channels from scratch
Extensive start up and digital marketing experience in both b2b and b2c
Gift for hiring talented people and inspiring them to greatness

George Ekas, Director of Support & Development

Bachelor of Science in Mechanical Engineering — Robotics & Mechatronics
Expert in ROS2, autonomous robots, and AI-driven systems
Chief Robot Systems Engineer at Sokul Automation (2019–2024)
Proven leader in advanced robotics design and team management

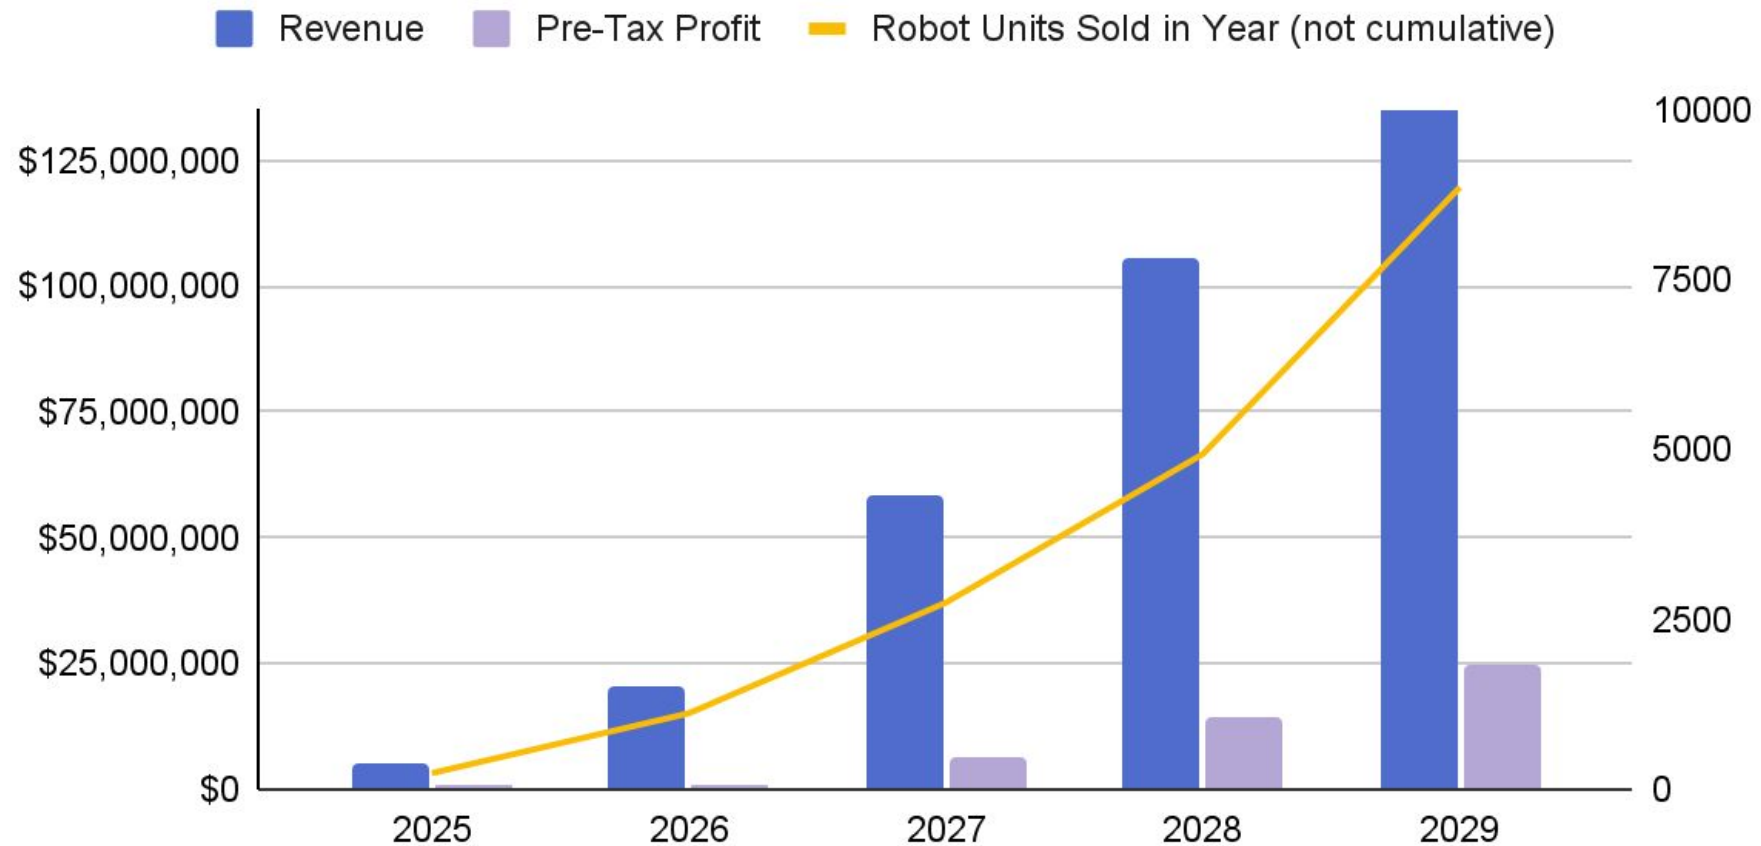

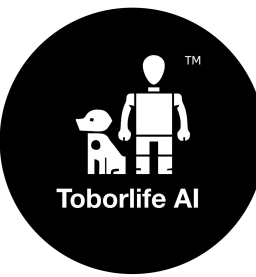

Joanna Shi, Accounting and Finance

Director of Accounting and Operations
International Technological University Santa Clara, California
Master of Business Administration
Deep Operational and Managerial Experience

David Schulhof, CEO
